PROFESSIONAL SUMMARY

Backend engineer with 2+ years of professional experience building and deploying 30+ production-grade Django systems across healthcare, fintech, logistics, and education sectors. Proven track record of leading backend teams, reducing API latency by up to 30%, and integrating real-time and AI-driven features into scalable architectures. Comfortable owning the full backend lifecycle from architecture design to cloud deployment with strong proficiency in REST APIs, WebSockets, Celery, Redis, and CI/CD pipelines.

TECHNICAL SKILLS

Languages

Python, JavaScript, C, C++, HTML

Databases

MySQL, PostgreSQL, Redis (caching & queues), S3

Real-time & async

WebSockets, Celery, SSE (Server-Sent Events)

Web Server

Nginx, Unicorn, Swagger / OpenAPI, Postman

Frameworks

Django, Django REST Framework, Django Channels

DevOps & Cloud

Docker, Git/GitHub, CI/CD, Railway, Render, DigitalOcean, Hostinger VPS, AWS

AI & Integrations

VAPI AI, OpenAI API, Webhook pipelines, REST API Integration, RabbitMQ

Security

AES/RSA encryption, Role-Based Access Control, JWT / Session Auth

PROFESSIONAL EXPERIENCE

Jr. Backend Developer, JVAI

12/2025 – Present
Dhaka, Bangladesh

- **QuranApp:** Built a region-based Quran application serving 100+ regional configurations with prayer time automation, Qibla distance calculation, and fasting tracker handling 5,000+ daily time-based updates accurately
- **SoundsByWade:** Django powered multi-role fitness platform with 10+ core modules, real-time communication, and payment integration. Workflows supporting 1,000+ concurrent user actions, processing for 5,000+ scheduled tasks daily, and reduced latency by ~35% through database and query optimization.

Live Link: [OrbitalFitess](#) 🔗

- **EduTutor:** Developed EduTutor, a multi-role learning platform (Admin / Teacher / Student) with an AI-powered assistant; delivered 20+ REST APIs covering authentication, role-based access, and learning workflows.

Live Link: [EduTutor](#) 🔗

- **Real-Time Collaboration & Communication System:** Engineered a Slack-like multi-channel communication system supporting real-time chat, video calling, and screen sharing across 100+ concurrent channel interactions with sub-200ms message delivery.
- **Roarse | Shipping Carrier System:** Integrated a real-time shipper-carrier live chat inside a Shipping Carrier System, reducing coordination delay by ~40% through persistent WebSocket connections

Live Link: [Roarse](#) 🔗

- **Hilliye | Multi-Vendor eCommerce Platform:** Currently architecting a Multi-Vendor eCommerce platform with 30+ endpoints, vendor onboarding, commission management, and role-based dashboards - optimised DB relations cut query time by ~25%.

Lead Django Developer, SevvenLabs

08/2025 – 12/2025
Dhaka, Bangladesh

- Led backend team of 3 developers; established code review standards and deployment pipelines that reduced release cycle time by 35%.
- Built and deployed HCRM - a Hospital CRM integrated with VAPI AI assistant and webhook pipelines - on VPS, cutting backend response latency by 30%.

- Coordinated with cross-functional teams (frontend, QA, design) to deliver production-ready features on schedule across 3 concurrent project tracks.

Django Developer, *Freelance*

01/2024 – 08/2025
Remote

- Delivered 30+ production-ready Django systems for clients across eCommerce, file-sharing, university transport, and AI-powered HR tooling - achieving 100% on-time delivery rate.
- Implemented REST APIs, MySQL/PostgreSQL databases, session-based authentication, and Celery task queues; systems collectively handled 10,000+ monthly active users.

EDUCATION

B.Sc. in Computer Science & Engineering, *Daffodil International University*

01/2022 – 12/2025
Dhaka, Bangladesh

- Relevant coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Computer Networks, Operating Systems.

LANGUAGES & AVAILABILITY

Bangla

Native

English

Professional working proficiency

KEY PROJECTS

HCRM - Hospital CRM, *Real-time SSE dashboard for AI-generated hospital data*

- VAPI AI integration for automated appointment booking and prescription generation. Deployed on VPS with 30% latency improvement. Stack: Django, VAPI AI, SSE, PostgreSQL.

Live Crypto Tracker, *Real-time cryptocurrency monitoring platform*

- Using Django, Celery, and Django Channels. Fetches live prices periodically and pushes WebSocket updates to clients with sub-second refresh intervals. Stack: Django, PostgreSQL.

Github: LiveCryptoTracker [↗](#)

Resume Ranking AI, *AI-powered resume screening system*

- Uses ML models to rank candidates against job descriptions. Features PDF/DOCX parsing, skill matching, and REST API support for HR system integration.

Github: ResumeRanking [↗](#)

University Transportation System, *Multi-role bus scheduling platform*

- (Super Admin / Supervisor / Student) with student auto-login via student ID (no password), daily route assignment, activity tracking, and admin reports. 186 commits; CI/CD via GitHub Actions; deployed on Render.

Github: Bahon [↗](#)

NovaShare - Secure File Sharing, *Enterprise-grade file-sharing platform*

- With AES/RSA encryption, RBAC, unique sharing links, expiration controls, and download limits. REST API support for third-party integration. Stack: Django DRF, PostgreSQL.

Github: NovaShare [↗](#)

TasteCart - Food Delivery Platform, *Full-featured food delivery app*

- Real-time order tracking, AJAX cart, and multi-role dashboards (Admin / Restaurant / Rider / Customer). Led as Project Lead and Backend Developer.

Github: TasteCart [↗](#)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

REST API Design & Development - Self-directed study

With production deployments as validation

Docker & DevOps for Backend Developers

Applied in VPS deployments across 5+ live projects

Leadership & Soft Skills - GoEdu (2022)

Team management, communication, and positive mindset development

ACHIEVEMENTS & IMPACT

Impact Summary

- 30+ production systems delivered with 100% on-time rate
- 30% backend latency reduction on HCRM (VPS deployment)
- AES-encrypted file-sharing platform with zero reported breaches
- Multi-vendor eCommerce platform with 30+ endpoints & 25% DB query optimisation
- Led 3-person backend team across 3 concurrent project tracks
- 10,000+ monthly active users across freelance portfolio
